

Flextur is Changing the Game with Innovative Fixture Solutions.

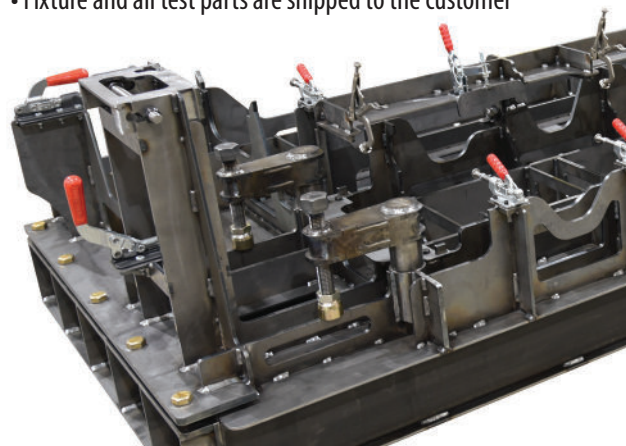

The process is rather simple:

- Identify the Project/Part(s) High Level Objectives, and timeline
- Customer provides STEP files once a simple NDA is executed
- Budgetary numbers are presented and approved
- Customer provides sample part(s) for baseline measurements
- Fixture design drawing is reviewed and approved
- Fixture is built and tested at Flextur prior to delivery
- Fixture and all test parts are shipped to the customer

Fixture faster, with less expense and greater flexibility.

What if fixtures could be **created quickly, affordably**, and could be **easily and cost effectively modified** if something changes? With Flextur, you can afford to create fixtures **faster**, with ROI's that make sense. Even for low volume parts. Benefit right away from **exacting repeatability**, and noticeable improvements in **speed, accuracy and weld quality**. Flextur designs fixtures for both manual and automated welding, turntables, head and tail stocks and Flextur's own Quick-Change Fixture Tables.

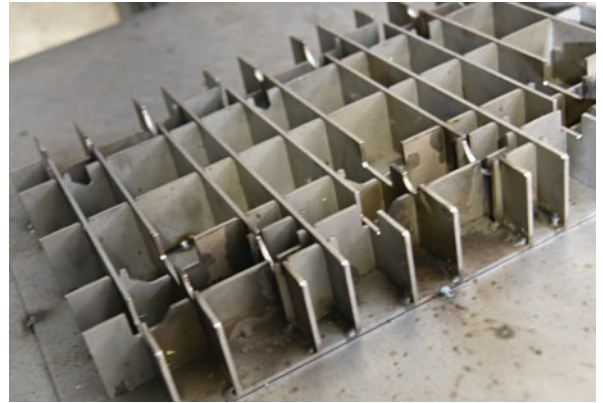

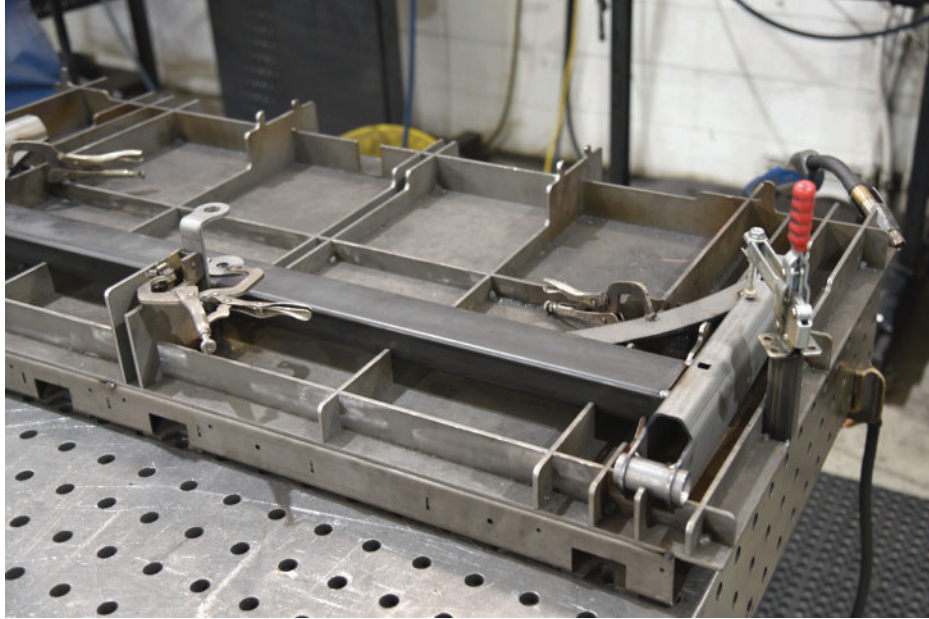

Many of our fixtures including engineering and proofing time sell for less than \$3,000.

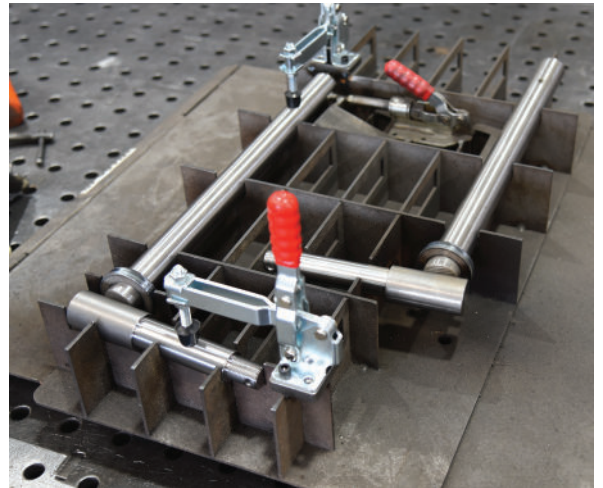

Flextur™

A more excellent way to work.

Innovative & Affordable Welding Fixtures

**Flextur is Changing the Game
with Innovative Fixture Solutions.**
