Your Welding Productivity

Our story starts in the heart of Ohio's Amish Country where values like hard work, family, and craftsmanship still matter.

Dalton, Ohio USA is home to Flextur and is in the heart of Ohio's Amish Country. It's where we've been rooted since 1978, innovating and fabricating high-quality products that are designed to stand the test of time.

We don't just develop and sell products—we use them every day. That's one way we know they work. Every welding table, fixture, and solution we build is made by people who understand hard work, and have what it takes to cut, form, weld and coat efficiently - delivering the kind of quality that speaks for itself.

For nearly 50 years, we've proven that some of the best things still come from right here at home.

New Nitride+

Nitride with Black Oxide Performance by Flextur.

Flextur's Nitride+ Weld Tables—built to handle the toughest welding environments with style and durability. These tables feature a striking black oxide finish over a hardened nitride surface, offering enhanced corrosion resistance, reduced spatter adhesion, and a premium look that stands out on your shop floor. Designed for serious welders who demand performance and precision, these tables are ready to work as hard as you do. USA-made, Dalton, Ohio.

Cobot Welding Systems

Create an extremely Accurate, Repeatable, Safe, Efficient Highly Productive, and Easy to Use Cobot Welding Cell.

The patent pending pneumatic clamping system accurately aligns and holds Fixture Plates in position every time.

DO NOT OPERATE without guards or fixture plates over clamps.

Quick-Change Fixture Plates ensure that your parts are positioned and clamped in the exact spot every time, (± 0.01 ") allowing you to create highly accurate, repeatable, automated workflows. Available in 72" x 36" and 36" x 36" sizes.

Gridlok INNOVATION

The industry's strongest metal toolboard for integrated tool storage. (page 8)

Two hand push button operation of pneumatic clamping system for operator safety.

Integrate your new or under utilized Cobots into Flextur's Welding System

to create an extremely accurate, efficient, safe, and highly productive, and easy to use welding cell. Using our patent pending Quick-Change Fixture Table and Quick-Change Fixture Plates to ensure that your parts are positioned and clamped in the exact spot every time, (± 0.01 ") allowing you to create highly accurate, repeatable, automated workflows.

Switch to a different part in minutes.

Release the pneumatic quick-detach welding Fixture Plate and return it to the Quick-Change Fixture Plate storage solution (page 4) that fits your needs. Choose the next Quick-Change Fixture Plate and safely clamp it into position with the touch of a button. Select your new program and keep your workflow humming.

Are You a First Time Cobot User?

Start your cobot welding journey with a system designed to grow with you. Flextur offers cost-effective, entry-level solutions like the Cobot Welding Pedestal and Power Supply Cart, perfect for first-time cobot users. Our modular design allows you to adapt your system as your skills and production needs evolve, ensuring long-term flexibility and efficiency. Whether you're integrating your first cobot or expanding an existing setup, Flextur's Cobot Welding System supports you every step of the way.
