

# Maximize Efficiency

## Flextur's Quick-Change Welding Tables

### 36" x 36" Quick-Change Table

The Flextur™ 36" x 36" Quick-Change Fixture Table is designed for use with the Flextur Cobot Docking Station and 36" x 36" Flextur Quick-Change Fixture Plate, allowing for faster changeovers and precise fixture placement. As part of Flextur's Cobot Welding System, this Quick-Change Table enhances the system's accuracy, efficiency, safety, and overall productivity for cobot welding solutions.

- Accurate within +/- .01"
- Leveling Feet
- 2-Hand safety switch
- Pneumatic operation
- Pneumatic quick connect included
- Grounding lugs & cable included
- Gridlok Innovation
- Patented Design

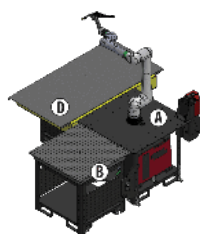

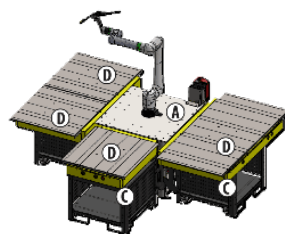

Part Number: **71500061**  
MSRP: **\$7,250.00**

\*Requires Docking Station\* (sold separately)

## The Flextur Cobot Welding System solves these three major issues:

1. **Complexity in Automation:** Designed for simplicity, it ensures ease of use and repeatability.
2. **Transitioning from Hand Welding:** Streamlines the shift to automation, making it seamless for your team.
3. **Slow Changeovers:** Enables faster setups to maximize arc-on time and boost productivity.

Flextur's advanced Cobot Welding System is equipped with Quick-Change Fixture Plates and has proven to boost productivity by over 300%!

When working with Flextur, you too can experience a surge in your metal manufacturing output, address labor and skills gaps, and overcome fixturing challenges.

**The Modular Design of the Flextur Cobot Welding System adapts with you.**
