

Maximize Efficiency

Flextur's Cobot Welding System

Cobot Docking Station

Flextur™ 40" x 40" Docking Station for mounting of cobot, wire feeder and power supply, with attachment points on three sides for Flextur Cobot Tables, or Quick-Change Fixture Tables. As a part of the Cobot Welding System by Flextur™ this Docking Station assists in creating an extremely accurate, efficient, safe, and highly productive cobot welding solution.

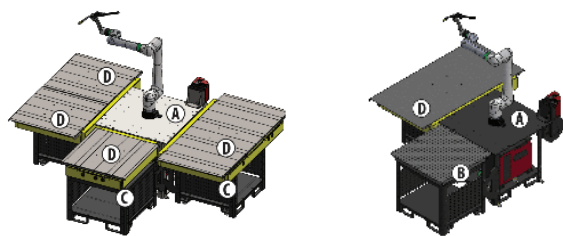

- Adjustable Level Feet
- Forkable
- Multiple Mounting Locations
- Accepts any Brand of Cobot
- Welder & Controller Storage
- Attachment Locations on 3-sides
- Patented Design

Part Number: **71500058**

The Flextur Cobot Welding System solves these three major issues:

- 1. Complexity in Automation:** Designed for simplicity, it ensures ease of use and repeatability.
- 2. Transitioning from Hand Welding:** Streamlines the shift to automation, making it seamless for your team.
- 3. Slow Changeovers:** Enables faster setups to maximize arc-on time and boost productivity.

Flextur's advanced Cobot Welding System is equipped with Quick-Change Fixture Plates and has proven to boost productivity by over 300%!

When working with Flextur, you too can experience a surge in your metal manufacturing output, address labor and skills gaps, and overcome fixturing challenges.

The Modular Design of the Flextur Cobot Welding System adapts with you.
